DETAILED ACTION

Allowable Subject Matter

Claims 1-11 and 14-30 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for generating and using attribute certificates. Each of the independent claims identify the uniquely distinct features of "a data handling arrangement for assembling content data specifying an attribute delegation from an identified issuer to a certificate subject, and including a condition requiring that a particular subject must have a particular attribute in order for the delegation to be valid". The closest prior art, Ginter et al (6,658,568), discloses a certificate with a control set for conferring rights to a subject. Ginter fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
